Equipment & Maintenance Management System

1. Project Overview

This Scope of Work (SOW) defines the implementation of a web-based Oilfield Equipment & Maintenance Management System for managing drilling machinery throughout its operational lifecycle. The system will provide complete visibility into equipment inventory, maintenance history, spare parts usage, service records, and equipment deployment to customer sites.

The solution will enable maintenance engineers to record servicing activities, track equipment movement, maintain service history, and generate operational reports, thereby improving equipment reliability, traceability, and operational efficiency.

2. Project Scope:

2.1 Master Data Management

The system shall include configurable master records including:

Equipment Master

Each equipment record shall include, but not be limited to:

- Equipment ID
- Asset Number
- Equipment Category
- Equipment Type
- Manufacturer
- Model
- Serial Number
- Engine Number (where applicable)
- Chassis Number (if applicable)
- Manufacturing Year
- Purchase Date
- Warranty Details

iProAT Solutions LLC. (CR NO: 1533264)

Office Address:

71/1, Al Amal Building, 7th Floor, Al Khuwair

P.O. Box: 3160, PC 111 Muscat, Sultanate of Oman

Info@iproat.com | +968 72211475

www.iproat.com

- Current Status
- Current Location
- Assigned Customer
- Assigned Site
- Photograph
- Equipment Documents

Customer Master

Maintain customer information including:

- Customer Name
- Customer Code
- Contact Information
- Site Locations

Site Master

Maintain oilfield and operational site information including:

- Site Name
- Customer
- Location
- Region
- Site Contact

Maintenance Type Master

Configurable maintenance categories including:

- Preventive Maintenance
- Corrective Maintenance
- Breakdown Maintenance
- Inspection

iProAT Solutions LLC. (CR NO: 1533264)

Office Address:

71/1, Al Amal Building, 7th Floor, Al Khuwair

P.O. Box: 3160, PC 111 Muscat, Sultanate of Oman

www.iproat.com

- Overhaul
- Calibration

2.2 Equipment Registration

The system shall allow registration of new machinery into the system.

Each machine shall have a unique equipment profile that stores:

- Technical specifications
- Operational information
- Service history
- Spare parts history
- Current deployment status
- Document repository

2.3 Equipment Receiving

When machinery arrives at the workshop for servicing, engineers shall record:

- Date Received
- Time Received
- Customer
- Site
- Equipment
- Odometer/Hour Meter Reading
- Reported Fault
- Condition upon Arrival
- Photographs
- Receiving Engineer
- Remarks

The system shall generate a service job reference number.

iProAT Solutions LLC. (CR NO: 1533264)

Office Address:

71/1, Al Amal Building, 7th Floor, Al Khuwair

P.O. Box: 3160, PC 111 Muscat, Sultanate of Oman

Info@iproat.com | +968 72211475

www.iproat.com

2.4 Maintenance Job Management

For every maintenance activity, engineers shall be able to record:

- Job Number
- Equipment Details
- Maintenance Type
- Complaint Description
- Root Cause
- Work Performed
- Diagnostic Findings
- Repair Details
- Inspection Results
- Technician Assigned
- Start Date & Time
- Completion Date & Time
- Job Status

Job statuses shall include:

- Open
- Under Inspection
- Waiting for Parts
- In Progress
- Completed

2.5 Spare Parts Management

The system shall maintain spare parts information including:

- Part Number

iProAT Solutions LLC. (CR NO: 1533264)

Office Address:

71/1, Al Amal Building, 7th Floor, Al Khuwair

P.O. Box: 3160, PC 111 Muscat, Sultanate of Oman

Info@iproat.com | +968 72211475

www.iproat.com

- Part Description
- Manufacturer
- Serial Number
- Batch Number (if applicable)
- Quantity Used
- Unit of Measure
- Warehouse Location

For every maintenance job, engineers shall record:

- Parts replaced
- Quantity consumed
- Serial number of installed parts
- Removed part serial number (where applicable)
- Installation date

The complete parts history shall remain linked to the equipment.

2.6 Service History

The system shall maintain a complete service history for every machine.

Each service record shall include:

- Service Date
- Maintenance Type
- Engineer
- Work Performed
- Parts Replaced
- Parts Serial Numbers
- Cost (optional)
- Supporting Documents

iProAT Solutions LLC. (CR NO: 1533264)

Office Address:

71/1, Al Amal Building, 7th Floor, Al Khuwair

P.O. Box: 3160, PC 111 Muscat, Sultanate of Oman

Info@iproat.com | +968 72211475

www.iproat.com

- Photographs
- Attachments

The history shall be searchable and filterable.

2.7 Preventive Maintenance Scheduling

The system shall support preventive maintenance scheduling based on:

- Calendar dates
- Kilometer readings
- Service intervals

The system shall generate reminders before maintenance becomes due.

2.8 Document Management

Each equipment profile shall support uploading and maintaining:

- Service Reports
- Inspection Certificates
- Calibration Certificates
- Warranty Documents
- User Manuals
- Photographs
- Customer Documents

Documents shall remain permanently linked to the equipment.

2.9 Notifications

The system shall generate notifications for:

- Upcoming preventive maintenance
- Overdue maintenance
- Equipment received
- Maintenance completion

iProAT Solutions LLC. (CR NO: 1533264)

Office Address:

71/1, Al Amal Building, 7th Floor, Al Khuwair

P.O. Box: 3160, PC 111 Muscat, Sultanate of Oman

Info@iproat.com | +968 72211475

www.iproat.com

- Pending approvals (if applicable)

Notifications may be delivered through:

- System Dashboard
- Email

2.10 Dashboard

Management dashboards shall provide real-time visibility into:

- Total Equipment
- Equipment in Workshop
- Equipment at Customer Sites
- Equipment Under Maintenance
- Preventive Maintenance Due
- Completed Jobs
- Open Jobs

2.11 Reports

The system shall provide reports including:

Equipment Reports

- Equipment Register
- Equipment Status Report
- Equipment Location Report

Maintenance Reports

- Maintenance History
- Maintenance Due Report
- Breakdown Report
- Workshop Activity Report
- Maintenance by Customer

iProAT Solutions LLC. (CR NO: 1533264)

Office Address:

71/1, Al Amal Building, 7th Floor, Al Khuwair

P.O. Box: 3160, PC 111 Muscat, Sultanate of Oman

Info@iproat.com | +968 72211475

www.iproat.com

- Maintenance by Site
- Maintenance by Equipment

Spare Parts Reports

- Parts Consumption
- Parts Usage by Equipment
- Parts Usage by Customer
- Serial Number Traceability

Reports shall support filtering, searching, exporting to Excel/PDF, and printing.
